let us help you **PROTECT** its integrity!

C575 SecurTainer™ I TAMPER EVIDENT Specimen Containers

Container made of polypropylene
Closure made of polyethylene

Especially designed for collection, transport and storage of specimens, Simport® offers shatter resistant polypropylene containers, eliminating most problems of leakage and evaporation. Containers are uniquely stackable, shatter resistant and are manufactured from virgin, polypropylene. The magenta lids are ribbed for easy opening when hands are wet or gloved while the jars are stackable for easy, safe storage and almost transparent to allow specimens to be viewed without opening. These straight sided containers are manufactured from virgin polypropylene with a unique integrated leak-resistant seal.

The uniqueness of the SecurTainer™ I is that it incorporates a unique tamper evident screw cap ensuring your peace of mind during transport or storage situations where someone might have manipulated the specimen without your prior knowledge. Can also be used without using the tamper evident locking mechanism.

Both containers and caps are manufactured without the use of plasticisers or mold release agents. Material used in manufacturing is free from latex. All containers are 95kpa compliant. Available in many sizes from 20 to 120 ml. Non sterile. Containers and caps packaged separately in bags of 100. Functional temperature range: -90 °C to +100 °C.

Cat. #	Volume	Qty/Pk	Qty/Cs
C575-20MA	20 ml	100	500
C575-40MA	40 ml	100	500
C575-60MA	60 ml	100	500
C575-90MA	90 ml	100	400
C575-120MA	120 ml	100	300

For IVD use

For color coding purposes, use a Capinsert™ on top of the closure. Ten different colors are available. (see T345 Series).
For more details and colors available please refer to page 18.

Place sample in container.

Push up tab on side of vial.

Screw on Tamper evident cap completely.

When opening the vial, the tamper evident ring will detach itself from the cap.

The SecurTainer™ I can also be used without the tamper evident feature.
